

NEW END CAPS FOR TOORS GUARDY

Dear customer,

we have implemented new innovations for residential doors TOORS GUARDY in terms of colour of end caps and changed standard of their usage.

WHITE END CAPS

All received **orders** for residential doors **will be supplied with white end caps** (RAL 9010). We are convinced that this design change and unification of internal design of door leaf will be appreciated not only by you but also by your customers and will support your sales.

DOUBLE WHITE END CAPS

In PI 154 (February 2018) we informed you about possibility to order double side end caps with double side hinges for all TOORS doors of all dimensions.

We are **setting this technical solution as new standard for residential doors TOORS GUARDY wider than 5000mm***. This design will improve long time smooth operation of door leaf in the door track set.

* double end caps are not available for panel design 141,137,138,131
