

## SLACK CABLE DEVICE

Dear customer,

from 20. 11. 2017 we extend our product range by **slack cable device with long cables.**

This change allows you to plug main electrical accessories on the doorleaf at using of two slack cable devices just in one connection box. Only in case of doorleaf with passdoor or door wider than 6 000 mm it is necessary to use two connection boxes.

**A new way of plugging in reduces the price of motor-operated doors by more than 21 EUR gross and speed up and simplify the installation.**
