

PANEL EQUIVALENT CRAWFORD

Dear customer,

After successful implementation of Hörmann panel equivalents (Product Info 181), we just added another panel type to our portfolio, which further extends our wide panel range. Currently it is about the most expanded panel Crawford equivalent- type 342, with 901 code.

Steel panel, with 500mm height and 42mm thickness, we have at disposal up to 6100mm length. Basic shade is RAL 9010/9010, with Stucco structure surface..

We can supply panel as:

- plain panel
- bottom section
- middle section
- top section

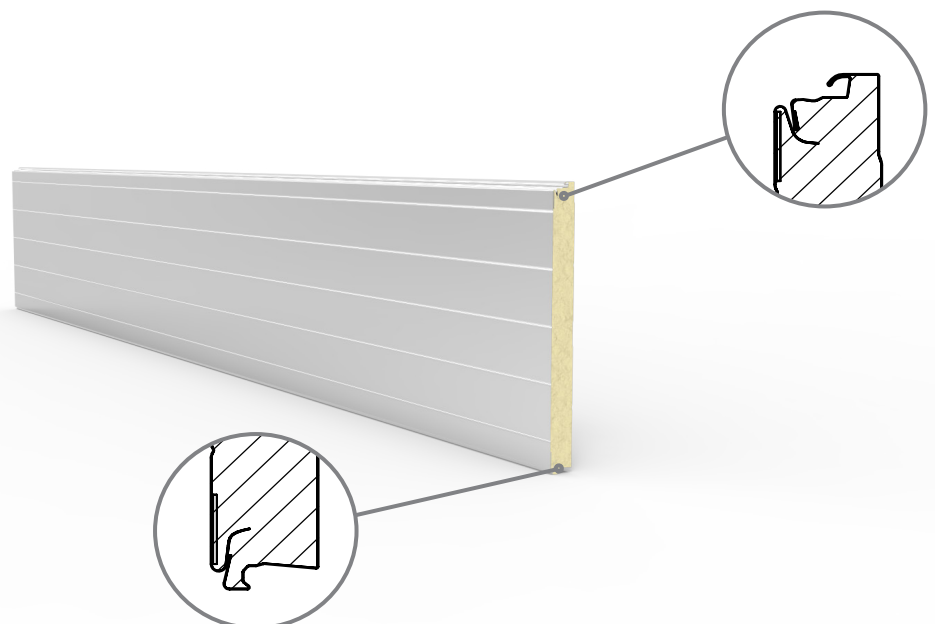

Already finalised sections are fitted by galvanized end caps. Bottom sealing is visually and constructionwise identical with original Crawford sealing. Top section is finished by aluminium profile, adjusted to panel width incl. top sealing.

At the moment, we offer these panels with no possibility to place accessories as windows, handgrip or wicket pass door.

On your request, it is possible to shop-paint to any shade, according to RAL, NCS or DB.

You can already order panels via our webshop of spare parts:
