

## PAINTING OF BOTTOM/TOP PROFILE ON PAINTED DOORS AS STANDARD OPTION

Dear Customer,

to meet the market demands we have decided to change the standard of painted door.

Customers often ask for painting bottom and top aluminum profiles when they order sectional doors painted according to RAL or NCS colour chart. Therefore painting both top and bottom profile in the same colour as the painted sections becomes now the standard. This new standard is valid for the industrial TOORS INDY doors as well as the residential TOORS GUARDY doors purchase orders processed since October 13<sup>th</sup>, 2014.

If there is painting of the door required from outside or from inside or from both sides the profiles will be **painted with the same colour** and from the same side accordingly. This option will be a default. No extra costs will be charged.

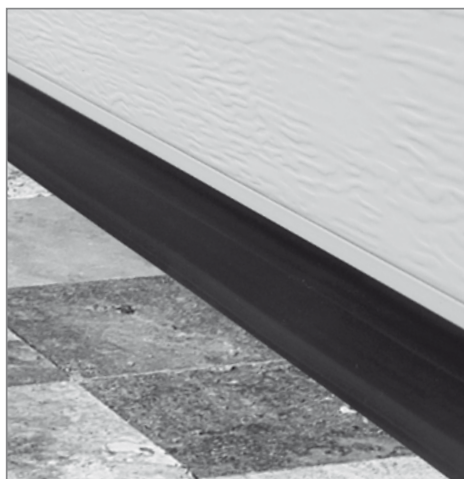

Attention: There is no change in painting of the pass door profiles. It has to be ordered separately and it is for surcharge.

On the other hand not painted top and bottom profile on painted doors is not the standard option and it has to be ordered separately when placing the order. We won't charge any additional price for not painted profiles.

Top section + profile > the same colour

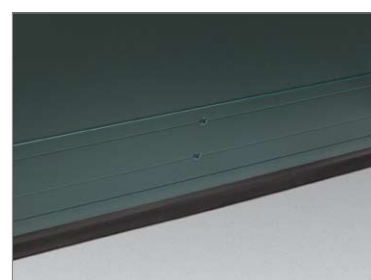

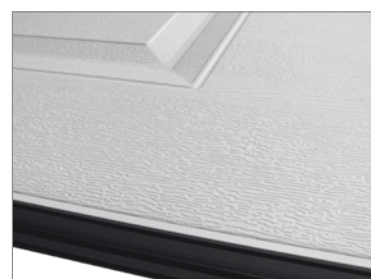

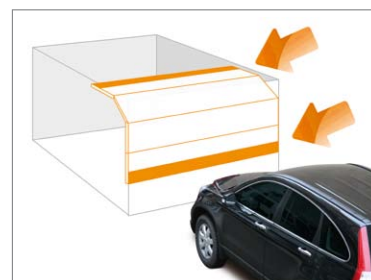

Bottom section + profile > the same colour

## SPECIFICATION

- Uniform design of door blade
- Painting of the bottom/top profile together with door blade
