

PROTECTION OF BOTTOM RUBBER SEALING FOR INDUSTRIAL DOORS TOORS INDY

Dear customer,

industrial doors TOORS INDY ordered from 01/06/2018 will be supplied with already installed plastic stops on bottom section.

ADVANTAGES OF THIS SOLUTION:

- Bottom rubber supplied on exact length, no need for adjustment on construction site
- Rubber sealing is secured against movement by these stops
- Bottom sealing is protected against deformation during installation
- In case of power operated door and not properly set up of bottom limit position protects the sealing and bottom safety edge against damages

These stops are available also as spare part with article number T09-005-0084.

You can find this item in our web catalogue in file Sealings -> bottom sealing
