

1 STANDARD

- traditional panel shape
- reinforced for installation of hinges
- polyurethane foam core free from HFCKW
- double-side hot-dip galvanizing
- 25 µm PES Polyester
- $U = 0,50 \text{ W/m}^2\text{K}$
- $R = 25\text{dB}$

2 PROTECT

- finger safe protection
- polyurethane foam core free from HFCKW
- double-side hot-dip galvanizing
- 25 - 35 µm PES Polyester
- $U = 0,50 \text{ W/m}^2\text{K}$
- $R = 25\text{dB}$

Color shades in RAL and NCS

RAL – best used system for determination of color shade in the industry of sectional doors; RAL numbers have four positions (1st position indicates group of color shade, 2nd position is always 0, last two positions specify color shade e.g. **6009**, **5010**).

NCS – is a proprietary perceptual color model based on the color opponency description of color vision; colors are defined by three values (specifying the amount of blackness, saturation, and a percentage value between two of the colors red, yellow, green or blue e.g. **2030-Y90R**, **0580-Y10R**).
