

ALTERNATIVE TO HÖRMANN

Dear customer,

it is pleasure for us to inform you that we have decided to extend our spare parts list.

We have included 851-SPU F42 panels which are fully replaceable with the Hörmann panels.

We would like to take this opportunity and help you to increase your service competitiveness and fast deliveries for your customers.

Offered panels are Lamella Stucco and are available in two heights - 625mm, 750mm, both size RAL 9002.

Following designs are available:

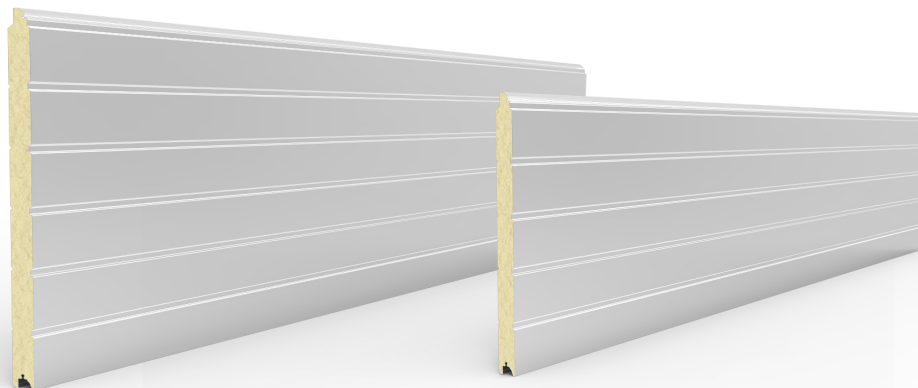

- panel with no endcaps
- bottom section
- middle section
- top section

The already finished sections are completed with painted endcaps RAL 9002. The bottom seal is fully structurally identical with the Hörmann original seal. The upper section is completed with an aluminium profile tailor made of the panel width and including the upper seal.

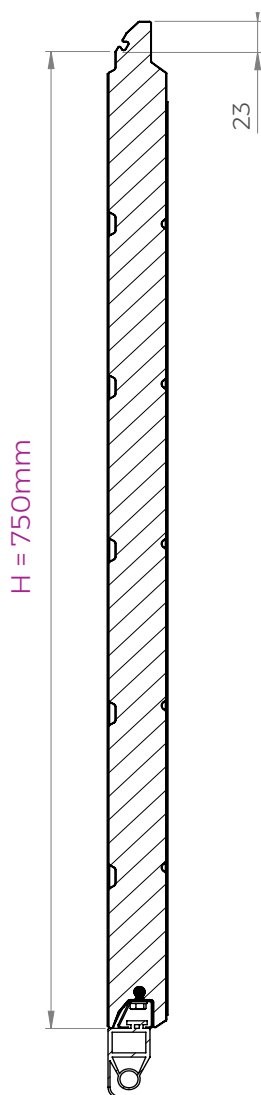

SPU F42 panels are currently available only without additional accessories such as windows, handgrip and pass door.

According to your request, all panels can be painted in any colour following the RAL, NCS or DB standards.

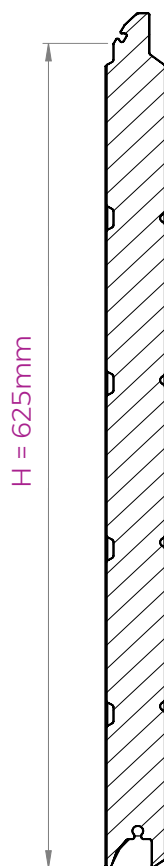

From now all panels can be order in our spare parts e-shop.

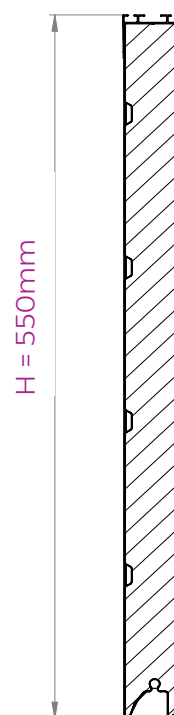

Bottom section

Middle section

Top section
